DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Vaucher ('849). The reference discloses a timepiece for indicating sunrise and sunset times and the position of the sun including hour and minute hands (col. 2, line 48), bottom plate 13 having sunrise and sunset time designations (Fig. 3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vaucher ('849) in view of Chen. The latter reference teaches placement of a sun symbol 121' on hour hand 12'. One of ordinary skill in the art having both references would have a suggestion to provide such a sun symbol on the hour hand of Vaucher as a means for identifying the device as a solar timekeeping device.

3. Claims 4-6 are allowed.
